

LegalEase

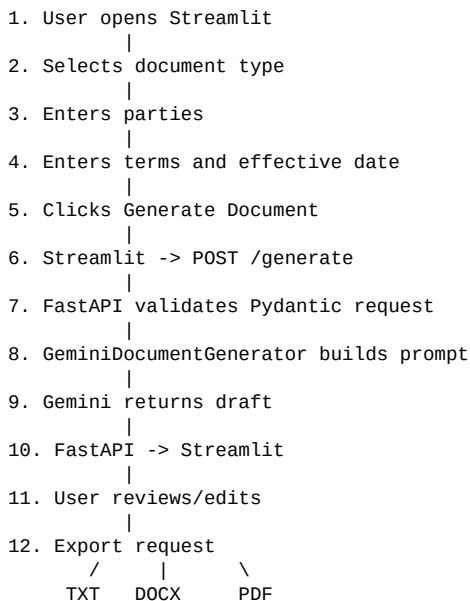

Workflow

Detailed Project Topic Document

Purpose: Describe the complete LegalEase workflow from user input to exported document.

The source architecture specifies Streamlit for interaction, FastAPI for API requests, Gemini for generation and formatting modules for DOCX/PDF/TXT output. [filecite\turn0file0\L113-L121](#)

Workflow

Example input

Document type: Freelance Work Contract
Parties: Jane Doe (Service Provider), TechNova Inc. (Client)
Effective date: April 10, 2025

Terms:
- Payment within 30 days
- Work delivered by agreed deadline
- Confidentiality maintained
- 15 days termination notice

The source documentation gives the same style of examples for document type, parties, terms and effective date. [filecite\turn0file0\L295-L325](#)

Output workflow

- Preview generated content in the browser
- Edit wording before export
- Generate a clean TXT version
- Generate formatted DOCX with title/footer and optional logo
- Generate formatted PDF with header/footer and optional logo

Source basis: This topic is derived from the supplied LegalEase project documentation. Where the source did not provide implementation detail, this document presents the corresponding implementation structure used in the completed project.
